

## POOL COVER MAINTANANCE

- Correct storage of your cover when it is not on your pool will extend its lifespan.
- Store out of the sun when not in use.
- Sweep your cover with a broom or your pool brush **wrapping a towel around the brush** once a week or whenever necessary, to remove excess water and leaves.
- Don't let dirt and/or gunk build up on the cover over long periods, as rotten garden debris could result in unsightly discoloration of the PVC material, especially on darker colored covers.
- Requires two adults to fit & remove the cover.
- Drainage is critical to the efficiency of the Solid Safety Cover. Please ensure that the water level of your pool is not too high underneath the cover.
- It is of upmost importance to look after your pool cover with correct care, a pool cover is on the swimming pool in the sun and the weather, so be sure to clean your pool cover once a week to avoid extreme discoloration as dirt, dust, and rotten debris will leave your pool cover unsightly if not kept clean.
- Spray the Ratchets with Q-20 at least once a month, to ensure ratchets to be in perfect working condition.
- DO NOT USE ANY DETERGENTS TO CLEAN THE POOL COVER
