

## Pool Covers Xtreme - Solid Safety Pool Cover with Aluminium Poles

The solid safety pool cover with aluminium poles is one of the single and most effective physical barriers to prevent child and pet drowning and securing your swimming pool besides the pool safety net. Our Customers especially the mom's love the fact that no force or even much effort is required when taking off or back onto the swimming pool. It is practical and most definitely user friendly due to the simplicity of design. The Solid Safety Pool Cover is the most desirable choice over any other pool safety systems.

### Benefits and Specs of the Solid Safety Pool Cover

- ◆ **Ease of use and Simplicity of design:** The Solid Safety Pool Cover is specially designed so it can quickly and easily be taken off and on the swimming pool. The Safety Cover is supported across the swimming pool with aluminium battens (poles) which is secured within the PVC Pool Cover. One end gets secured and anchored into place with a stainless steel hook and plate. The opposite end has corresponding ratchets which allows the cover to be tightened.
- ◆ **Drainage System:** The Solid Safety Pool cover features drainage holes to eliminate the risk of water gathering on top of the Pool Cover. Water will drain through the drainage holes.
- ◆ **Todler and Pet Proof:** The Solid safety Pool Cover is toddler as well as pet proof. The lockable strapping ratchet system makes it difficult for a small child to tamper with or attempt to release the Pool Cover.
- ◆ **Aesthetics:** Not only will you have peace of mind with a secured swimming pool, it looks great too.
- ◆ **Colour choices:** The most popular colours are dark blue, black, khaki, and beige but you can choose from a variety of colours to match the overall feel of the outdoor living area.
- ◆ **Electricity Energy Saving:** With a Solid Safety Pool Cover you can save up to 70% on your electricity bill. You can reduce your swimming pool pump running time up to 70% as well as chemical usage and overall maintenance as sunlight is the only source that draws chemicals from your swimming pool.
- ◆ **Reduce Water Evaporation:** This Pool Cover has proven to reduce water evaporation with up to 90% which saves you a lot on the long run especially with all the water restrictions this might just be what you need.
- ◆ **Material used:** 550gsm Tarpaulin with a PVC coating. Aluminium battens (poles). Industrial strength ratchets.
- ◆ **Reduced debris**
